

## How to Play Freaky Trumps

Freaky Trumps is for 2 or more players. The idea of the game is to win all of the cards. At the start of the game, all of the cards must be shuffled and dealt out equally face down. The cards are then held face up and held so that only the top card can be seen.

The player to the dealer's right begins play. The cards contain certain facts and figures such as speed, skill, stamina etc. The starting player calls out one of these figures that he/she feels will win, and the other players call out their figure, the highest figure wins. These cards are then taken by the winner and placed at the bottom of their pack and then it is their turn to call the next figure/fact. If however, more than one player has the highest score then the cards are placed in the middle and the original caller calls again until someone wins and they then take all of the cards.

The player that holds all of the cards at the end of the game is the winner.
